### Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

## Acknowledgements

First of all, I would like to thank my first promotor Francesco. Thank you very much for the sheer amount of freedom that I got and the faith you expressed in me. Your enthusiasm certainly made it easier to stay focused on the end-goal (of which this actually is a part) and also a very pleasant journey. Your door was always open and a brief discussion was never out of limit. I do admire your perseverance and the workload you tackle on a daily, weekly, annual basis. Hopefully, all the hard work pays off (perhaps through a lucrative spin-off?).

I would also like to thank my second promotor, Ton. Thank you for bringing ‘enhanced oil recovery’ to Groningen and thank you for providing me with the opportunity to work on this project!

The financial support of the Dutch Polymer Institute (DPI) is greatly acknowledged. The progress review meetings were very helpful in developing the focus of research and I would like to thank all participants for their valuable input: Durgesh, Jan, Thierry, Olivier, Nicolas, Cédric, Diego, Esther, Marco, Andrew, Anke, Bill, Pouyan, Pacelli, and of course Ton and Francesco.

A special thanks to the Assessment Committee, Erik, Loris, and Valter, for reading and evaluating my work and to the Reading Committee, Diego, Patrizio, Ranjita, and Jan. Thank you for all your valuable comments.

The office (5118.0213) always was a brilliant little hang-out. Thank you Diego, Valeria, and Arjan for welcoming me to the office. You were always very kind in explaining the ins-and-outs of several programs Arjan! That was really helpful. El Gordito (Arjen), you made my stay in the office even more pleasurable. Thank you for exhibiting all my empty jars of peanut butter. And thank you for all the word jokes and for practicing Spanish with me. El Jefe (Pablo), thank you for introducing me to RMF FM: Polskie Przeboje, Party, and Classic Rock. Boy, what

a great music was played in our office. How different from what we played in the lab, isn't it Martijn? Thank you for your help with LaTeX as well. Without you, I would have most probably put my faith in MS Word. Zahra, it was very nice to have you in the office. You should have stayed with us! El Mal Amigo (Laurens), how much stuff can you store on (and under) your desk, as well as the windowsill? Ragazzo (Francesco Filippi) and Nicola, thank you for a short, but enjoyable time!

Several students have survived my supervision, well to a greater or lesser extent. Special thanks to Tim (piratenhits!), Benjamin (work horse), Noelia, Sonia, and Nadalina (when will you finish your work?) for contributing to the present work. But, I would also like to thank the other students: Marc, Jasper, Maarten, Thom (trek hem maar) and Marte.

The department would not have been the same without the study association G.T.D. Bernoulli. This, obviously, is the most interesting study association in Groningen, as it offers her members a huge number of different activities and incredibly flamboyant people. Especially the coffee hour was much appreciated. I would like to thank all the boards and members that put in some effort to make the association what it has become today! Thank you Frank H., Arjan ter H., Bas, Beerd Dries, Daniël, Dina, Fenna, Folkert, Geert, Ibrahim, Jasper P, Jasper van den S., Jesper, Loes, Johan, Johnny, Karin, Kevin, Marten, Martine, Nathalie, Remon, Stefan, Philippe, Marit, Tom, Kenny, Wouter-Jan, Matthijs, Jorn, Henk, Hero, Martijn, Thiadrik, Tim (pilspiloot) and all the people I have overlooked.

Also the non-students from department, starting with the to-be professors Peter, Jun, Patrizio, Ranjita, and Paolo and the professors: Michel, Geert, Kees, Paul, Erik, and Francesco. Thank you Martijn (also for musical guidance), Douwe Sjirk, Yifei (lab supervisor of the month!), Qingqing, Henky, Cynthia, Anna, Maria, Ionella, Prima, Henk, Susanti, Monique, (patat mét) Frita, Patrick, Yasser, Bhawan, Jan-Willem, Agnes, Wang & Wang, Ria, Inouk, Zhenchen. A special thanks to Arne, Tim, and Arjen for all the fun conversations we have had! Also our trip to New York was amazing, please do not forget to shut the door, Tim! Marya, thank you for all the nice conversation we had which always ended on topics complete different from what we started with. Thank you for your secretarial support as well!

Anne, Marcel, and Erwin, your help and technical expertise was very useful. Thank you for assisting me in the construction of set-ups, maintaining it, and repairing it. And, thank you for lending me the socket set uncountable times! My work in the lab could not have proceeded without the help of Jan Henk and Leon. Thank you for helping me out with the GPC, rheometer, and the GC set-up!

Paranymhs, Paula and Yifei, thank you very much for assisting me and helping me out with all the preparations!

And last but not least, I would like to thank my family: Piet, Joke, Els, and Paula. Thank you for your support! And, of course all the people I forgot to list!
